POWDER TECHNOLOGY

# Subject Index of Volume 97

Acceleration
accelerating motion of a vertically falling sphere in incompressible Newtonian media: an analytical solution, 6
Adhesion
adhesion characteristics of whole milk powder to a stainless steel surface, 191
Adsorption
the influence of surfactant impurities on colloid stability and dispersion of powders in aqueous suspensions, 129
Agglomeration
description of agglomerate growth, 183
examination of dispersed liquid-phase three-phase fluidized beds. Part 1. Non-porous, uniform particle systems, 208
an investigation into the kinetics of liquid distribution and growth in high shear mixer agglomeration, 246
Axial dispersion model
a simulation model for analysis and design of continuous grinding mills, 51

Bubble detection
bubble detection with horizontal pressure gradient measurements in gas-fluidised beds, 77
Bubbling fluidized bed
effect of particle size on solids mixing in bubbling fluidized beds, 170

Calcium carbonate
effect of precipitation conditions on the morphology of calcium carbonate: quantification of crystal shapes using image analysis, 1
Calcium hydroxide
formation of $CaTiO_3$ by grinding from mixtures of CaO or $Ca(OH)_2$ with anatase or rutile at room temperature, 178
Calcium oxide
formation of $CaTiO_3$ by grinding from mixtures of CaO or $Ca(OH)_2$ with anatase or rutile at room temperature, 178
Calcium titanate
formation of $CaTiO_3$ by grinding from mixtures of CaO or $Ca(OH)_2$ with anatase or rutile at room temperature, 178
Carbonation
effect of precipitation conditions on the morphology of calcium carbonate: quantification of crystal shapes using image analysis, 1
Ceramic injection moulding
slip flow in concentrated alumina suspensions, 118
Choking
a novel method for determination of choking velocities, 59
Circulating beds
a novel method for determination of choking velocities, 59
Circulating fluidized beds
predicting the degree of particle refluxing in cocurrent upflow risers, 146
Coagulation
the influence of surfactant impurities on colloid stability and dispersion of powders in aqueous suspensions, 129
Coating mass distribution
coating mass distributions of seed particles in a tumbling fluidized bed coater, 85
Cohesive
examination of dispersed liquid-phase three-phase fluidized beds. Part 1. Non-porous, uniform particle systems, 208
Cohesive powder
the tensile strength of cohesive powders and its relationship to consolidation, free volume and cohesivity, 237
Compaction
an investigation into the kinetics of liquid distribution and growth in high shear mixer agglomeration, 246
Compression–permeability cell
stress distribution in a confined wet cake in the compression–permeability cell and its application, 16
Consolidation stress
the tensile strength of cohesive powders and its relationship to consolidation, free volume and cohesivity, 237
Cycled shear
effect of shear schedule on particle size, density, and structure during flocculation in stirred tanks, 26

Defluidization
examination of dispersed liquid-phase three-phase fluidized beds. Part 1. Non-porous, uniform particle systems, 208
Deposition
adhesion characteristics of whole milk powder to a stainless steel surface, 191
Dispersion
the influence of surfactant impurities on colloid stability and dispersion of powders in aqueous suspensions, 129
Distribution functions
the hyperbolic tangent distribution family, 100
Dodecanol
the influence of surfactant impurities on colloid stability and dispersion of powders in aqueous suspensions, 129
Down-scaling
description of agglomerate growth, 183
Drag
accelerating motion of a vertically falling sphere in incompressible Newtonian media: an analytical solution, 6
particle settling in oil-in-water emulsions, 72
Drying technology
adhesion characteristics of whole milk powder to a stainless steel surface, 191

Elutriation
carry-over from shallow fluidized beds, 45
Emulsions
particle settling in oil-in-water emulsions, 72
Entrainment
carry-over from shallow fluidized beds, 45

Experimental conditions
fractional factorial designs for optimizing experimental conditions for Hiestand's Indices of Tableting Performance, 151

Filtration
stress distribution in a confined wet cake in the compression–permeability cell and its application, 16
analysis of operational filtration data Part II: Incomplete cleaning of candle filters, 139
Floc structure
effect of shear schedule on particle size, density, and structure during flocculation in stirred tanks, 26
Flow instability
flow instability in non-fluidized standpipe flow, 109
Flow visualization
a fractal analysis of solids mixing in two-dimensional vibrating particle beds, 63
Fluidised beds
modelling of sintering in high temperature gas fluidisation, 160
Fluidization
examination of dispersed liquid-phase three-phase fluidized beds. Part 1. Non-porous, uniform particle systems, 208
Fluidization regime terminology
fluidization of ferromagnetic particles in a magnetic field. Part 2: Field effects on preliminarily gas fluidized bed, 35
Fluidized bed coating
coating mass distributions of seed particles in a tumbling fluidized bed coater, 85
Fluidized beds
fluidization of ferromagnetic particles in a magnetic field. Part 2: Field effects on preliminarily gas fluidized bed, 35
carry-over from shallow fluidized beds, 45
a novel method for determination of choking velocities, 59
minimum liquid fluidization velocity in two- and three-phase fluidized beds with non-Newtonian fluids, 124
Fractal dimensions
effect of shear schedule on particle size, density, and structure during flocculation in stirred tanks, 26
Fractals
a fractal analysis of solids mixing in two-dimensional vibrating particle beds, 63
Fractional factorial designs
fractional factorial designs for optimizing experimental conditions for Hiestand's Indices of Tableting Performance, 151
Free volume
the tensile strength of cohesive powders and its relationship to consolidation, free volume and cohesivity, 237

Gas-fluidised bed
bubble detection with horizontal pressure gradient measurements in gas-fluidised beds, 77
Gasification
modelling of sintering in high temperature gas fluidisation, 160
Granular media
particle dynamics simulation: a hybrid technique applied to granular mixing, 91
Granulation
an investigation into the kinetics of liquid distribution and growth in high shear mixer agglomeration, 246
Gravitational fields
Monte Carlo simulation of particle segregation, 200
Grinding
formation of $CaTiO_3$ by grinding from mixtures of CaO or $Ca(OH)_2$ with anatase or rutile at room temperature, 178
Grinding mills
a simulation model for analysis and design of continuous grinding mills, 51

High gradient magnetic separation
experimental observations on the saturation mass in the capture process of an ordered transverse high gradient magnetic separation matrix, 233
High temperature
modelling of sintering in high temperature gas fluidisation, 160
Horizontal pressure gradients
bubble detection with horizontal pressure gradient measurements in gas-fluidised beds, 77
Hot-gas cleanup
analysis of operational filtration data Part II: Incomplete cleaning of candle filters, 139

IGCC
analysis of operational filtration data Part II: Incomplete cleaning of candle filters, 139
Image analysis
effect of precipitation conditions on the morphology of calcium carbonate: quantification of crystal shapes using image analysis, 1
Image processing
a fractal analysis of solids mixing in two-dimensional vibrating particle beds, 63
Impurities
the influence of surfactant impurities on colloid stability and dispersion of powders in aqueous suspensions, 129
Indices Tableting Performance
fractional factorial designs for optimizing experimental conditions for Hiestand's Indices of Tableting Performance, 151
Instability
a novel method for determination of choking velocities, 59
Integrated gasification combined cycle
analysis of operational filtration data Part II: Incomplete cleaning of candle filters, 139
Interparticle force
variations in disperse composition of dry powders according to energy of their dispersion, 227
the tensile strength of cohesive powders and its relationship to consolidation, free volume and cohesivity, 237
Interparticle forces
fluidization of ferromagnetic particles in a magnetic field. Part 2: Field effects on preliminarily gas fluidized bed, 35
examination of dispersed liquid-phase three-phase fluidized beds. Part 1. Non-porous, uniform particle systems, 208

Local cake properties
stress distribution in a confined wet cake in the compression–permeability cell and its application, 16

Magnetic separation
experimental observations on the saturation mass in the capture process of an ordered transverse high gradient magnetic separation matrix, 233
Magnetism
fluidization of ferromagnetic particles in a magnetic field. Part 2: Field effects on preliminarily gas fluidized bed, 35
Mechanochemistry
formation of $CaTiO_3$ by grinding from mixtures of CaO or $Ca(OH)_2$ with anatase or rutile at room temperature, 178
Mercury intrusion
an investigation into the kinetics of liquid distribution and growth in high shear mixer agglomeration, 246
Milk products
adhesion characteristics of whole milk powder to a stainless steel surface, 191
Minimum fluidization velocity
minimum liquid fluidization velocity in two- and three-phase fluidized beds with non-Newtonian fluids, 124

Mixer
an investigation into the kinetics of liquid distribution and growth in high shear mixer agglomeration, 246
Mixing
particle dynamics simulation: a hybrid technique applied to granular mixing, 91
Modelling
a simulation model for analysis and design of continuous grinding mills, 51
description of agglomerate growth, 183
Moments
the hyperbolic tangent distribution family, 100
Monte Carlo simulation
Monte Carlo simulation of particle segregation, 200
Morphology
effect of precipitation conditions on the morphology of calcium carbonate: quantification of crystal shapes using image analysis, 1

Non-Newtonian liquids
minimum liquid fluidization velocity in two- and three-phase fluidized beds with non-Newtonian fluids, 124

Orifices
flow instability in non-fluidized standpipe flow, 109

Parallel wire matrix
experimental observations on the saturation mass in the capture process of an ordered transverse high gradient magnetic separation matrix, 233
Parameter estimation
the hyperbolic tangent distribution family, 100
Particle dispersion
variations in disperse composition of dry powders according to energy of their dispersion, 227
Particle dynamics
particle dynamics simulation: a hybrid technique applied to granular mixing, 91
Particle growth
coating mass distributions of seed particles in a tumbling fluidized bed coater, 85
Particle segregation
Monte Carlo simulation of particle segregation, 200
Particle size
an investigation into the kinetics of liquid distribution and growth in high shear mixer agglomeration, 246
Particle size analysis
variations in disperse composition of dry powders according to energy of their dispersion, 227
Particle size distribution
variations in disperse composition of dry powders according to energy of their dispersion, 227
Planetary ball mill
formation of $CaTiO_3$ by grinding from mixtures of CaO or $Ca(OH)_2$ with anatase or rutile at room temperature, 178
Pneumatic transport
a novel method for determination of choking velocities, 59
Porosity
an investigation into the kinetics of liquid distribution and growth in high shear mixer agglomeration, 246
Precipitation
effect of precipitation conditions on the morphology of calcium carbonate: quantification of crystal shapes using image analysis, 1

Randomness
bubble detection with horizontal pressure gradient measurements in gas-fluidised beds, 77
Refluxing
predicting the degree of particle refluxing in cocurrent upflow risers, 146
Rheological parameters
slip flow in concentrated alumina suspensions, 118
Risers
predicting the degree of particle refluxing in cocurrent upflow risers, 146

Sample preparation
variations in disperse composition of dry powders according to energy of their dispersion, 227
Saturation mass
experimental observations on the saturation mass in the capture process of an ordered transverse high gradient magnetic separation matrix, 233
Sedimentation
effect of shear schedule on particle size, density, and structure during flocculation in stirred tanks, 26
particle settling in oil-in-water emulsions, 72
Settling velocity
particle settling in oil-in-water emulsions, 72
Shear induced flocculation
effect of shear schedule on particle size, density, and structure during flocculation in stirred tanks, 26
Simulation
a simulation model for analysis and design of continuous grinding mills, 51
bubble detection with horizontal pressure gradient measurements in gas-fluidised beds, 77
particle dynamics simulation: a hybrid technique applied to granular mixing, 91
Sintering
modelling of sintering in high temperature gas fluidisation, 160
Size distributions
the hyperbolic tangent distribution family, 100
Slip flow
slip flow in concentrated alumina suspensions, 118
Solids mixing
effect of particle size on solids mixing in bubbling fluidized beds, 170
Solution splitting
accelerating motion of a vertically falling sphere in incompressible Newtonian media: an analytical solution, 6
Sphere–fluid
accelerating motion of a vertically falling sphere in incompressible Newtonian media: an analytical solution, 6
Spraying
coating mass distributions of seed particles in a tumbling fluidized bed coater, 85
Standpipes
flow instability in non-fluidized standpipe flow, 109
Stress distribution
stress distribution in a confined wet cake in the compression–permeability cell and its application, 16
Stress free surfaces
flow instability in non-fluidized standpipe flow, 109
Surfactants
the influence of surfactant impurities on colloid stability and dispersion of powders in aqueous suspensions, 129
Suspensions
slip flow in concentrated alumina suspensions, 118
adhesion characteristics of whole milk powder to a stainless steel surface, 191

Tangent hyperbolic distribution family
the hyperbolic tangent distribution family, 100

Tensile strength
the tensile strength of cohesive powders and its relationship to consolidation, free volume and cohesivity, 237
Three-phase flow
minimum liquid fluidization velocity in two- and three-phase fluidized beds with non-Newtonian fluids, 124
Titanium dioxide
formation of $CaTiO_3$ by grinding from mixtures of CaO or $Ca(OH)_2$ with anatase or rutile at room temperature, 178
Torque
an investigation into the kinetics of liquid distribution and growth in high shear mixer agglomeration, 246
Transmitted force
stress distribution in a confined wet cake in the compression–permeability cell and its application, 16
Transverse ordered matrix
experimental observations on the saturation mass in the capture process of an ordered transverse high gradient magnetic separation matrix, 233
Two-phase flow
minimum liquid fluidization velocity in two- and three-phase fluidized beds with non-Newtonian fluids, 124

Uniformity of coating
coating mass distributions of seed particles in a tumbling fluidized bed coater, 85
Unsaturated flow
description of agglomerate growth, 183

Vertical pressure gradients
bubble detection with horizontal pressure gradient measurements in gas-fluidised beds, 77
Vibrated beds
a fractal analysis of solids mixing in two-dimensional vibrating particle beds, 63

Wake exchange coefficient
effect of particle size on solids mixing in bubbling fluidized beds, 170
Wall friction
stress distribution in a confined wet cake in the compression–permeability cell and its application, 16
